

"I heard it through the Grapevine "

The Software Center sends periodic informational messages which are intended to provide heads-up/real time information to Software Professionals throughout the Command. These "information messages" are not intended to by-pass or replace the formal communication process or to task any DCMC or CAO activity. Forwarding of this e-mail within the DCMC Software Professional community and to other interested DCMC employees is encouraged.

Your feedback is appreciated.

1. Software Professional Development Program Update: Lead - Mark Keenan

As you are probably aware, the SPDP Program is being updated. Primary focus is the incorporation of risk based surveillance. The updated SPDP guide is currently at HQ awaiting approval. It will be distributed in the near future via DCMA Tasking Memorandum.

As you are also probably aware, the SPDP program will incorporate Computer Based Training (CBT) as part of its curriculum. The CBT is being planned as prerequisites to attend classroom training and for Certification Maintenance. However, access to CBT courses to DCMA software professionals enrolled in SPDP is available now. The "SPDP_CBT_Installation_Procedures" file walks you through registration and player download process. The "SPDP_CBT_Navigation" file provides instructions on how to navigate throughout the CBT web site to find the required SPDP courses.
